BIL – Pipeline information
www.bil-leitungsauskuTnung.de

Dear Sir/Madam

Depending on the **scope of your project**, the verifiable documents listed below are required in order to enable terraneTnets bw GmbH to submit a statement regarding the planned project:

- **Construction drawings**
on such a scale and with as many cross-sections as needed to ensure that the intended construction project is clearly visible from them. The terraneTnets bw facilities must be included in the corresponding plans.
- **Site plan with area boundaries and boundaries of cadastral sections and land parcels (German: “Gemarkungs-, Flur- und Flurstücksgrenzen”)**
- **General plan scale 1:25 000 / 10 000 north arrow and scale**
- **Summarised construction and operation description**
with particular consideration paid to planned measures for protecting the facilities of terraneTnets bw

Please note that processing your application may take a few days. A **minimum lead time of 10 working days** serves as appropriate to ensure our mutual interests at the planning stage. Contacting us in good time enables us to include our requirements, conditions and information for builders/building owners in the plans and to implement them during the construction phase. Please refer to the map material provided. We expressly point out that such maps **do not** constitute pipeline information.

To obtain pipeline information, please submit an application via the BIL online portal attaching the verifiable documents listed above.
