

Price List
terranet**s bw GmbH**
- hereinafter referred to as terranet**s bw -**

Effective from: 1 January 2018

Fees which are based on the revenue cap for the year 2018
(§ 6 No. 5 of the Cooperation Agreement IX (*German: KoV IX*))

Stuttgart, 01 December 2017
(Complemented Version dated 31 July 2018)

FOR YOUR INFORMATION: ONLY THE GERMAN DOCUMENT IS LEGALLY BINDING

Introduction

This price list is an integral part of the General Terms and Conditions for the Entry and Exit Contract (entry-exit system) of terranets bw GmbH and of internal orders pursuant to § 11 of the Cooperation Agreement between the operators of gas supply grids in Germany as amended on 10 March 2017, effective from 1 April 2017 (Cooperation Agreement VIII – *German KoV IX*).

I. Fees for firm annual capacities

1. List of entry and exit points as well as entry and exit fees for firm, available entry or exit capacity

1.1 Entry points and entry fees

Entry point	Grid operator	Annual capacity fee (firm) €/ (kWh/h)/a*
Lampertheim IV	GASCADE Gastransport GmbH	4,41410
Fronhofen 1	Storage facility	4,41410
Hahnennest-EPH	Biogas injection	0

* including fees for operating the capacity platform

1.2. Exit points and exit fees

Exit zone/ regional cluster	Downstream grid operator	Annual capacity fee (firm) €/ (kWh/h)/a*
Lampertheim IV (reverse flow)	GASCADE Gastransport GmbH	4,41410
RC Aalen	Stadtwerke Aalen GmbH	4,41410
RC Baden-Baden	Stadtwerke Baden-Baden	4,41410
RC Badenova	bnNETZE GmbH	4,41410

* including fees for operation of the capacity platform

/ without fees for metering, metering point operation as well as biogas levy and gas quality conversion levy to convert L-gas to H-gas (*German: Marktraumumstellungskosten*)(v. Section I.2)

2. Fees for metering, metering point operation, biogas levy, gas quality conversion levy

	Annual capacity fee €/ (kWh/h)/a
Metering	0.00267
Metering point operation	0.02402
Biogas levy	0.68443
Gas quality conversion levy	0.25869

In the sense of § 13 (3) of the GasNEV and § 15 (7) GasNEV, costs for metering and metering point operation will be appropriated to all exit points of the Transmission System Operators (TSOs). All exit fees are subject to fees for metering and metering point operation.

In the sense of to § 25 of the General Terms and Conditions for Entry/Exit Contracts and respectively §10 of the Cooperation Agreement IX (*KoV IX*) distributional costs for the conversion of L gas regions to H gas regions (German: MRU-Umlage) are appropriated to all German exit points in the market area of the TSO.

All fees for end consumers and downstream grids are subject to a biogas levy.

The fee for metering, metering point operation, biogas levy and gas quality conversion for capacity products of less than one year is the result of the proportionate value of the annual fee ($\frac{1}{365}$ or $\frac{1}{366}$ if it is a leap year), rounded to eight places after the decimal point, multiplied by the number of days of the respective product contract term.

The fee for metering, metering point operation, the biogas levy and gas quality conversion levy for within-day capacity products corresponds to the fee for a daily product with a product contract term of one day.

II. Grid fees for entry and/or exit capacity products of less than one year

Pursuant to Section 2 lit. a of the decision of the Federal Network Agency dated 24 March 2015, Ref.: BK9-14/608, which determines stipulations concerning the conversion of annual demand charges into demand charges for capacity rights of less than one year and stipulations to properly calculate grid fees as set out in § 15 para. 2 of GasNEV (BEATE), a multiplier is to be applied for the conversion of annual demand charges into demand charges for capacity rights of less than one year at entry and exit points and for all capacity products of less than one year (within-day, daily, monthly and quarterly capacity products). The multiplier for daily capacity products is 1.4, the multiplier for monthly products is 1.25, the multiplier for quarterly capacity products is 1.1.

The following categories shall apply for these purposes:

	Capacity product contract term
Daily product	1 – 27 days
Monthly product	28 – 89 days
Quarterly product	90 – 364 days

Within-day capacity products will be handled with the same multiplier as for daily capacity products (1.4).

The fee for capacity products for contract terms of less than one year is the result of the proportional value of the annual capacity fee, rounded to eight places after the decimal point, ($\frac{1}{365}$ or $\frac{1}{366}$ if it is a leap year) multiplied by the number of days of the respective product contract term and the multiplier which applies corresponding to the product contract term. Within-day capacity products are priced as a daily capacity product with a product contract term of one calendar day.

The multipliers are not applied to other fees such as metering point operation, metering, biogas levy and gas quality conversion levy.

III. Grid fees for interruptible capacity

In accordance with statutory regulations, terranets bw also offers interruptible entry and exit capacities.

terranets bw is obliged to hold available the booked interruptible capacity at the agreed entry or exit points on an interruptible basis taking into consideration any possible allocation stipulations and usage restrictions.

Pursuant to Section 2 lit. b of the decision BEATE of the Federal Network Agency there is a reduction for interruptible capacity products based on the respective calculated fee at the booked point for firm capacity products. The price for an interruptible capacity product is 90 % of the respective firm capacity product according to Sections I and II for the relevant point. An exception to this is a capacity product at the entry point Lampertheim IV. At the entry point Lampertheim IV, the price for an interruptible product is 89 % of the fee calculated for a firm capacity product according to Section I and II.

There is no reduction for other fees such as metering point operation, metering, biogas levy and gas quality conversion levy.

IV. Reduced fees for injection and withdrawal of capacities at storage facilities

Pursuant to Section 2 lit. d of the decision BEATE of the Federal Network Agency a reduction is granted to storage facility operators of 50 % on the fees shown in Section I, II and II.

V. Fees for dynamically allocable capacities (DZK)

terranets bw offers dynamically allocable capacities according to the provisions of the Supplementary Terms and Conditions for Entry/Exit Contracts

The network fee for dynamically allocable capacities is 90 % of the network fee which would be payable for the booking of freely allocable capacity according to Sections I and II.

All fees according to Section I (3) for metering point operation, metering, the biogas levy and the market area conversion levy (MRU-Umlage) are not reduced.

VI. Transmission period

Transmission starts and transmission ends at 6:00 h of the relevant day or of the subsequent day respectively (CET/CEST).

VII. Contractual penalty for exceeding ordered / booked capacity

For the periods from 01.01.2018, 6:00 am until 01.04.2018, 6:00 am and 01.10.2018, 6:00 am until 01.01.2019, 6:00 am the contractual penalty payable by the downstream grid operator in accordance with § 18 No. 7 of the Cooperation Agreement (KoV IX) for capacity overruns amounts to two times the yearly capacity fee on the highest hourly overrun on this day. It is recalculated every day. The yearly capacity fee is charged in addition to the fees for metering point operation, metering, the biogas levy and the market area conversion levy (MRU-Umlage) according to Section I of the Price List. As a result the fees for metering point operation, metering, the biogas levy and the market area conversion levy (MRU-Umlage) are also multiplied with the factor two.

For the period from 01.04.2018, 6:00 am until 01.10.2018, 6:00 am the contractual penalty payable by the downstream grid operator in accordance with § 18 No. 7 of the Cooperation Agreement (KoV IX) and for the period 01.01.2018, 6:00 am until 01.01.2019, 6:00 am the contractual penalty payable by the shipper in accordance with § 30 No. 4 of the General Terms and Conditions for the Entry and Exit Contract (Entry-Exit System) for capacity overruns amounts to four times the daily capacity fee on the highest hourly overrun on this day. It is recalculated every day. The daily capacity fee is the result of proportionate value of the annual capacity fee, rounded to eight places after the decimal point ($\frac{1}{365}$ or $\frac{1}{366}$ if it is a leap year). The daily capacity fee is charged in addition to the fees for metering point operation, metering, the biogas levy and the market area conversion levy (MRU-Umlage) according to Section I of the Price List. As a result the fees for metering point operation, metering, the biogas levy and the market area conversion levy (MRU-Umlage) are also multiplied with the factor four.

In case of an overrun of the internal order capacity the overrun will also be invoiced for the respective month in accordance with § 18 No. 6 of the Cooperation Agreement (KoV IX).

VII. Rounding rule

Invoice amounts in euros are to be rounded up or down to two decimal points corresponding to normal business practice (if the third decimal point is five or more, the amount is to be rounded up; if the third decimal point is four or less, the amount is to be rounded down). The rounding process takes place at the end of the calculation.
